10 YEARS OF ACOUSTIC TREATMENT

In 2006, sE invented the Reflexion Filter - and with it, a whole new category of recording equipment. In the last ten years, over 120,000 RF products have been sold worldwide.

We've seen our RFs in the studio with artists ranging from legendary hip-hop producer Dr. Dre to film score composer / producer Simon Franglen ('Titanic', 'Avatar', 'Spectre'), from Tom Petty performances on stage to Blake Shelton sessions in the Hollywood Hills, and even to The White House (in First Lady Michelle Obama's "Go To College" music video).

The original RF Pro is undeniably the industry standard for simple, effective acoustic treatment for recording vocals and more.

"The Reflexion Filter has made a big impact on the quality of our home recordings." - *Tegan and Sara*

sE's patented multi-layer technologies diffuse sound evenly across the whole frequency spectrum.

With multiple layers of acoustic-grade wool, metal, vented composite panels, aluminum, and specially-placed air gaps, **sE's Reflexion Filters provide an uncolored, natural vocal or instrument sound** - no matter where you're recording.

This is what makes our RF Series unique, and what makes it the choice of the biggest recording artists in the world - whether they're working in untreated rooms, or working in a professionally- designed studio and just need a little more isolation.

"I use it to keep the bad out and the good in."
- F. Reid Shippen (Ingrid Michaelson, Jonny Lang)
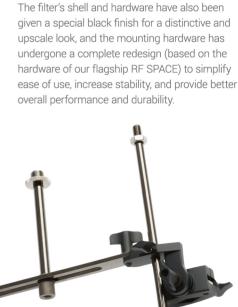

THE LIMITED EDITION

Though the layered construction is essentially the same as the classic RF Pro, the Anniversary Edition includes a special layer of red acoustic fabric behind the immediately recognizable perforated metal rear panel, and a custom-engraved metal logo badge.

The filter's shell and hardware have also been given a special black finish for a distinctive and upscale look, and the mounting hardware has undergone a complete redesign (based on the hardware of our flagship RF SPACE) to simplify ease of use, increase stability, and provide better overall performance and durability.

"It made a $0 an hour bedroom into a professional recording space." - *Simon Franglen ('Avatar', 'Titanic', 'Spectre')*

"Everyone should have one." - *Ryan Hewitt (Red Hot Chili Peppers, Avett Brothers)*
