

# sE5 Pair | Small Diaphragm Condenser Microphone

## SMALL DIAPHRAGM CONDENSER MICROPHONE

The sE5 Pair improves upon the high quality performance of its predecessor, the popular sE4 Pair - and in doing so sets the new standard for small diaphragm microphones at its price. Designed for studio and live use with a smooth full range frequency response and excellent transient handling the sE5 Pair is the perfect choice for recording drums, percussion, pianos and any stringed acoustic instrument.

Finished in matt black the sE5 Pair feature a cardioid polar pattern, 100Hz bass cut and -10/-20db pad switches.

They also include a custom shock mount so you're ready to capture high quality recordings straight out of the box.

## APPLICATIONS

Stringed instruments, piano, drums, percussion.

## FEATURES

**Cardioid Polar Pattern:** delivers clean and smooth on-axis response, with off-axis rejection essential when recording the source instrument in-situ with other noise sources such as other instruments or room ambience.

**Matt black finish:** Minimizes the level of attention drawn to the microphone when used on stage / recording live performances.

**100Hz Bass Cut:** May be applied to decrease the level of proximity effect, typical in cardioid pattern microphones when they are placed very close to sound source or to isolate from low frequency rumble from other sources.

**-10dB/-20dB Pad:** These switch settings can be used if recording a very 'hot' or loud signal. So, if the sound source is very loud such as when

close mic'ing drums or a guitar cabinet the -10dB or -20dB settings will reduce the level output from the microphone to the connected microphone preamp, ensuring a high quality signal is delivered.

**Custom sE5 Shock Mount:** Every sE5 Pair includes 2 custom-designed shock mounts in the box for each microphone, which are essential in use to reduce the unwanted effects of vibration or knocks to the supporting microphone stand.

# sE5 Pair | Small Diaphragm Condenser Microphone

## TECHNICAL SPECS:

- Type: Condenser
- Directional pattern: Cardioid
- Frequency range: 20Hz - 20kHz
- Sensitivity: -34dBV/ Pa
- Rated impedance: 200 ohms
- Equivalent noise level: 14 dB
- Signal-to-noise ratio: 80 dB
- Maximum SPL: 170 dB
- Supply voltage: 48V

## BOX CONTENTS

- 2x sE5 Small Diaphragm Condenser Microphone
- 2x sE5 Shock Mounts
- Stereo Bar
- Flight Case.

## OPTIONAL ACCESSORIES

Reflexion Filters™ (Portable Vocal Booths):

- sE IRF2 Instrument Reflexion Filter
- sE RF-X/sE PSRF/sE RF Pro (for guitars)

**AVAILABILITY:** Shipping Now

**PRICE (SRP):** £399 EX VAT, €479 EX VAT
