1- SYMBOLS

Graphic symbols used on this manual:

THIS SYMBOL INDICATES A HOT SURFACE

THIS SYMBOL INDICATES ELECTRIC SHOCK RISK

THIS SYMBOL INDICATES GENERAL RISK

THIS SYMBOL MEANS “YOU CAN PLACE THE UNIT ON NORMALLY FLAMMABLE SURFACES”

THIS SYMBOL INDICATES THE MINIMUM DISTANCE FROM THE ILLUMINATED OBJECTS

THIS SYMBOL INDICATES THE EUROPEAN COMMUNITY DIRECTIVE 2002/96/EC ON WASTE ELECTRICAL AND ELECTRONIC EQUIPMENT (WEEE)

2- GENERAL WARNING

Read the instruction contained in this user manual carefully, as they give important information regarding safety during installation , use and maintenance.

The device is not for domestic use and must be installed by a qualified electrician or experienced person.

Always disconnect the device from the mains before maintenance.

The device must always be equipped with an efficient ground connection.

3- GENERAL WARRANTY CONDITIONS

The unit is guaranteed for 36 months from the date of purchase against manufacturing material defects.

4- TECHNICAL FEATURES

Overview

NICK NRG 1401 is a high performance LED wash moving head.

Extreme brightness, single pixel control, and 4° - 52° zoom range make this fixture perfect in a range of applications, either as a beam light with multi-color rays, or as a wash light with a very wide projection.

NICK NRG 1401 is suitable for medium/big venues, and it's the perfect for TV studios, delivering top-of-the-line visual effects of perfectly uniform wash lighting.

DTS Product code:

03.LDR015.FFP

NICK NRG 1401 FC FPR Black finish

LED Technology

- * 23 x 15W OSTAR STAGE "N" FULL RGBW LEDs
- * Pixel to pixel control
- * 11.500 Lumen

Optical group

- * 4°- 52° linear motorized zoom with high-efficiency optical system
- * PC Beam to very wide Wash projections

Colour generation

- * 16 million colours
- * Wide palette of pure uniform whites
- * Variable linear colour temperature (2700K – 8000K)

Interface / Control / Programming

- * Multi-function OLED graphic colour display + 4 soft keys: control / management / monitoring of the main parameters
- * Controlled via DMX 512 and RDM standard digital communication protocols
- * Internal operating system updatable via DTS RED BOX interface via "DTS firmware upgrade utility" program on windows based PC

DMX

33 DMX channels (default), 111 DMX channels or 20 DMX channels

Pan & Tilt

- * 'FPR' system (DTS patent)
- Pan: limitless rotation, in both direction, 360° rotation in 0.89 sec.
- Tilt 270°: 1,2 sec.
- * 16-bit movement resolution

Power supply

- * Electronic full-range AC 90-260V 50-60 Hz
- * Power consumption: 390W Max

Connectors

- * DMX: 4 XLR (3 pins In / Out and 5 pins In / Out) panel connectors
- * Power supply: PowerCon In / Out panel connectors

Operating ambient temperature

-10° / 40°

Weight

13 Kg

International certifications

Certification CE

LED Class: Class 2 LED product

Dimensions**Packaging Dimensions (LxWxH)**

530 x 430 x 414 mm

Weight: 16 Kg

5- ACCESSORIES

As standard

- 1 x PowerCon male cable connector (cod. 0520P014)
- 1 x XLR 5 Pins male cable connector (cod. 0508B066)
- 1 x XLR 5 Pins female cable connector (cod. 0508B065)
- “C” Clamp GQUICK with “Fast Lock” connection 1/4 turn (cod. 0521A014)
- User’s manual

Optional (on request)

Flight case

- Professional Flight case for 4 units; compartment for accessories, swivel wheels, cover with hinges with-stay, dishes on cover for piling, 8 handles (2 eachside) (cod. 0521C059.1)

Clamps / safety wires

- “C” Clamp G60 black (max. load 50Kg) (cod. 0521A004)
- “C” Clamp G100 black / professional (max. load. 200Kg) (cod. 0521A015)
- Aliscaf clamp for tube diameter 50 mm (max. load. 100Kg) (cod. 0521A008)
- Omega bracket with “Fast Lock” connection 1/4 turn (Cod. 02K00467)
- Safety wire (3mm x 60 cm), max. capacity load 60Kg (cod. 0521A010)

6- IMPORTANT SAFETY INFORMATION

6.1 Fire prevention:

- It is permissible to place the unit on normally flammable surfaces. Suitable for mounting on normally flammable materials surfaces greater than 200°C with some combustion time lag.
- Minimum distance from the closest illuminable surface: 0,5 m. LED 
- Replace any blown or damaged fuses only with those of identical value (5AT). Refer to the wiring diagram if there is any doubt.
- Connect the projector to mains power via a thermal magnetic circuit breaker.

6.2 Prevention of electric shock:

- High voltage is present inside the unit. Unplug the unit prior to performing any function which involves touching the inside of the moving head.
- The level of technology inherent in the NICK NRG 1401 requires the assistance of specialised personnel for all servicing. Please refer to an authorised D.T.S. service centre.
- A good earth connection is essential for proper functioning of the projector.
- Never connect the unit without proper earth connection.
- The fixture should be located in places with a good air ventilation.

6.3 Safety:

- The projector should always be installed with bolts, clamps and other tools that are capable of supporting the weight of the unit.
- Always use a second safety cable to sustain the weight of the unit in case of the failure of the main fixing point.
- The external surface of the unit, at various points, may exceed 70°C. Never handle the unit until at least 10 minutes have elapsed since the projector was turned off.
- Never install the fixture in an enclosed area lacking sufficient air flow. The ambient temperature should not exceed 40°C.

6.4 Level of protection against the penetration of solid and liquid objects:

- The projector is classified as an ordinary appliance and its protection level against the penetration of solid and liquid objects is IP 20.

6.5 Waste Electrical and Electronic equipment (WEEE) directive:

- The machine, accessories and packaging should be sorted for environmental-friendly Recycling.
- For EC countries: according to the European Directive 2012/19/EC for Waste Electrical and Electronic Equipment and its implementation into national right, luminaires that are no longer usable must be collected separately and disposed of in an environmentally correct manner.

7- VOLTAGE AND FREQUENCY

The NICK NRG 1401 can operates at 90-260Vac 50-60 Hz.

8- INSTALLATION

The unit is suitable for dry locations only.

NICK NRG 1401 may be either floor or ceiling mounted.

For floor mounting installations, the NICK NRG 1401 is supplied with four rubber mounting feet on the base.

For ceiling mounted installations, we recommend the use of appropriate clamps to fix the unit to the mounting surface.

The supporting structure from which the unit is hung should be capable of bearing the weight of the unit, as should any clamps used to hang it. The structure should also be sufficiently rigid so as not to move or shake whilst the NICK NRG 1401 is moving.

Four 1/4 turn Fast Locks connections placed in the base of the unit allow to hang the NICK NRG 1401 by using the Fast Lock "C" clamp provided in the box.

8.1- Safety cable

A safety cable must be securely fixed to the NICK NRG 1401 and to the suspension truss in order to avoid the fixture accidentally falling should the main fixing point fail.

Make sure that the safety cable can bear the weight of the entire unit.

A suitable safety cable (code 0521A010) is available on demand.

You may attach the safety cable to the attachment point (A) located on the base of the fixture, as shown in the picture below.

8.2 Protection against liquids

The projector contains electric and electronic components which should under no circumstances come into contact with oil, water or any other liquid. The proper unit functioning would be compromised should this occur.

8.3- Movement

Unlimited Pan rotation; Tilt 270° (1,2 sec.)

Do not place any obstructions in the path of the projector's movement.

**8.4- Risk of fire**

Each fixture produces heat and must be installed in a well-ventilated place. It is permissible to place the unit on normally flammable materials surfaces. Suitable for mounting on normally flammable materials surfaces greater than 200°C with some combustion time lag.

Minimum distance from the object being illuminated is 0,5 m. LED 

**8.5- Forced ventilation**

You will note, on inspection, that the unit features various air inlets and cooling fans. These should, under no circumstances, be blocked or obstructed whilst the projector is in operation. Doing so could cause the fixture to seriously overheat thereby compromising its proper operation.

8.6- Ambient temperature

The projector should never be installed in places that lack a constant air flow. The ambient temperature should not exceed 40°C.

9- MAINS CONNECTION

NICK NRG 1401 operates at 90-260Vac 50-60 Hz.

Prior to connecting the unit to your mains supply, ensure that the model in your possession correctly matches the mains supply available.

For connection purposes, ensure that your plug is capable of supporting 2 amps at 230Vac, or 5 amps at 90Vac.

Strict adherence to regulatory norms is strongly recommended.

9.1- Protection

The use of a thermal magnetic circuit breaker is recommended for each NICK NRG 1401.

10- DMX SIGNAL CONNECTION

The unit operates using the digital DMX 512 (1990) signal.

Connection between the mixer and the projector or between projectors must be carried out using a two pair screened $\varnothing$ 0.5 mm cable and a XLR 5 or 3 pins connector.

Ensure that the conductors do not touch each other.

Do not connect the cable ground to the XLR chassy.

The plug housing must be isolated. Connect the mixer signal to the DMX IN projector plug and connect it to the next projector by connecting the DMX OUT plug on the first projector to the DMX IN plug of the second one.

This way, all the projectors are cascade connected.

NB. If the display showing the DMX address flashes, then one of the following errors has occurred:

- DMX signal not present
- DMX address not valid
- DMX reception problem

For Installations where long distance DMX cable connections are needed, we suggest to use a DMX terminator.

The DMX terminator is a male XLR 3-5 pins connector with a 120 ohm resistor between pin 2 and 3.

The DMX terminator must be plugged into the last unit (DMX out panel connector) of the DMX line.

PLACE A 120 OHM RESISTOR BETWEEN PIN 2 AND 3 OF A MALE XRL CONNECTOR AND PLUG IT INTO THE DMX OUT PANEL CONNECTOR OF THE LAST UNIT CONNECTED TO THE DMX LINE

10.1-DMX Addresses

NICK NRG 1401 can be controlled with 33 DMX channels, 111 DMX channels or 20 DMX channels.

In order to use the unit in 33 DMX channels (default), set the following addresses on the mixer:

Projector 1	A001	
Projector 2	A034	If you want to select the next projector, just add "33"
Projector 3	A067	
.....	A....	
projector 6	A166	

10.2-Selecting the DMX address

- 1) Press the UP-DOWN key until you reach the required DMX channel. The numbers on the display will start to flash (but the new DMX address hasn't yet been set).
- 2) Press ENTER to confirm your selection. The numbers on the display will stop flashing and the projector is now setted to the new DMX address.

TRICKS:

If you keep pushed the UP or DOWN keys, the channels are calculated more quickly and you get a faster selection.

11- FIRMWARE UPDATING

Attention:

This procedure require a base knowledge of computer applications.

Please refer to an authorised DTS service centre.

To update the software version of the NICK NRG 1401 you need:

- DTS RED BOX interface (DTS Code: 03.LA.008);
- USB-DMX Driver for the DTS RED BOX interface;
- "DTS Firmware upgrade utility" program installed on your PC;
- Latest firmware available for NICK NRG 1401 unit.

Updating the software version.

Please follow the procedure below to perform the update:

1. Install the DTS RED BOX USB-DMX driver on the PC you will use to update the unit software.
2. Connect the DTS RED BOX interface to the PC by using a USB cable.
3. Connect the DTS RED BOX interface to the fixture by using a DMX cable.
4. Load the new firmware into the unit by using "DTS Firmware upgrade utility" program.

12- DISPLAY FUNCTIONS

The NICK NRG 1401 display panel shows all the available functions . Using these functions, it is possible to change some of the parameters and add some functions. Changing the D.T.S. setting can vary the functions of the unit so that it does not respond to the DMX 512 used to control it. Carefully follow the instructions below before carrying out any variations or selections.

NOTE: the symbol  shows which key has to be pushed to obtain the desired function.

Software version 2.19

  **Display**  

DISPLAY POSITION / STAND BY

Display Position:
Reverses display's reading depending on the mounting position (on the ground or suspended).

Display Standby:
To turn off the display (after 30 seconds) or leave it always on.

Display Position
ON THE GROUND
(Default)
SUSPENDED

Display Standby
OFF = Display Standby
disabled (Default)
ON = Display goes Off
after 30 seconds

**DMX Set****DMX MODE**

SHAPES: 33 DMX channels (default).

This mode allows to combine pixel shapes on a foreground level with pixels on a background level.

EXTENDED: 111 DMX channels.

This menu allows to control pixel to pixel.

COMPATIBILITY: 20 DMX channels.

This mode allows to have compatibility in programming when using NICK NRG 1401 with other DTS range LED units (NICK NRG 1201, NICK NRG 801, NICK NRG 501 and WONDER).

MACRO Mode

STD = Standard (Default)

EXT = Extended; enable rainbow effects on Macro channel

DIMMER DELAY

This menu allows to select the value of the delay (in seconds) for the Dimmer channel reaction to DMX or program variation

**LED****RGBA MIN / MAX VALUES**

This menu allows to select the Minimum / Maximum levels for Red, Green, Blue and Amber/White

SMOOTH VALUE

This menu allows to select the value of the delay (in milliseconds) for RGBA and Dimmer channels reaction to DMX or Program variation.

1 = Fast response

20 = Slow response

GAMMA CORRECTION

This menu allows to select between Linear current output or Quadratic current output for LEDs
Default = Quadratic

OUTPUT FREQUENCY

This menu allows to adjust the PWM frequency value (Hz) in order to reduce flickering in the process of your camera recordings

BOOST

This menu allows to increase the LED's current from 670 mA to 1000 mA (default).

SLAVE

SLAVE MODE SETTING

This menu allows to set the NICK NRG 1401 as slave unit. DMX signal must be present from MASTER unit (set in AUTO MODE) in order to run the units in SLAVE mode.

By setting all the SLAVE units connected to the MASTER, to DMX address 1, them will be synchronized with the Master unit following the chase selected on it, but running their own Pan&Tilt and Zoom position.

The SLAVE unit receives DMX signal from the MASTER unit. By setting all the SLAVE units connected to the MASTER, to DMX address 1, them will be synchronized with the Master unit following the chase selected on it, but running their own Pan&Tilt and Zoom position.

WIRELESS DMX

Wireless DMX enabled / disabled.
By activating W-DMX MODE, it will be possible to control NICK NRG 1401 via D.T.S. ANTENNA Wireless DMX Transmitter (cod. 03.E1271).

**Wireless DMX Receiver Kit
(Code 03.LA.126) on NICK NRG
1401 is available on request.**

WIRELESS DMX
SYSTEM DISABLED
(Default)

WIRELESS DMX SYSTEM
ENABLED

UNLINK = LOG OUT

Logging on NICK NRG 1401 (WIRELESS DMX must be enabled on the unit).

To log on the NICK NRG 1401 in the WIRELESS system simply press and quickly release the function button on the transmitter .

The transmitter will start flashing rapidly red/green scanning for new free receivers / NICK NRG 1401 units. When a NICK NRG 1401 logs on to the transmitter the LINK green light on transmitter starts to flash rapidly.

After approximately 10 seconds the transmitter will jump back to normal mode and continue transmitting data. The NICK NRG 1401 now try to synchronize to the transmitter.

When synchronized to the transmitter, 2 different modes are possible:

1. Antenna transmitter has detected and transmits a DMX signal, in this mode a solid green light is seen on the transmitter and solid display is seen on NICK NRG 1401.
2. No DMX signal connected, the Antenna transmitter will flash red/green; display blinking on NICK NRG 1401.

To log off NICK NRG 1401 from a transmitter simply select UNLINK function under WIRELESS DMX MENU and press ENTER.

When NICK NRG 1401 is logged off the display is blinking, meaning its available for log in on a new transmitter.

Logging out a NICK NRG 1401.

Select UNLINK function under WIRELESS DMX MENU and press ENTER.

When NICK NRG 1401 is logged off the display is blinking, meaning its available for log in on a new transmitter.

Logging out all NICK NRG 1401 linked to a transmitter.

Press and hold the function button of the transmitter for about 3 seconds. When the display is blinking on NICK NRG 1401, it mean that the units are logged out.

Transmitter, Status LED.

Flashing red/green, no dmx connected.

Solid green, dmx signal detected and transmitted.

Fast flashing red/green, log in mode (every free NICK NRG 1401 unit, not logged in to any other transmitter, will be logged on)

NICK NRG 1401 Status.

Display blinking, not logged on to a transmitter (free).

Solid display, logged on to a transmitter and receiving dmx data.

EMERGENCY

Emergency operating mode.
By setting Emergency mode, it will be possible to select one of the 16 pre-programmed WHITE cues that will then run if DMX signal is missing or not available.
Useful for Emergency EXIT illumination on public areas.
Dimmer level, Pan&Tilt and Zoom values selectable by user.

13- PERIODIC CLEANING

Front lenses Glass

The dust can reduce the luminous output substantially.

Regularly clean the front lenses glass using a soft cotton cloth, dampened with a specialist glasses cleaning solution.

Fans and air passages

The fans and air passages must be cleaned approximately every 6 weeks.

This periodic cleaning will depend of course, on the conditions in which the projector is operating.

Suitable instruments for performing this type of maintenance are a brush and a common vacuum cleaner or an air compressor.

If necessary, clean the fans and air passages more frequently.

14- PERIODIC CONTROLS

Mechanical parts

Periodically check all mechanical parts and the gaskets, replacing them if necessary.

Electrical components

Check all electrical components for correct earthing and proper attachment of all connectors, refastening if necessary.

Attention: Disconnect mains power prior to removing the projector housing.

Fuse replacement

Locate the fuse, which protect the electronics, in the base of the NICK NRG 1401. Using a multimeter, test the condition of the fuse, replacing it with one of equivalent type (5AT) if necessary.

Attention: Disconnect mains power prior to removing the projector housing.
